

Top Ten Report - April 2022

Reviewed & submitted the CVMM SCY Matt Biondi March meet and the MVN Swim Meet of Champions to the National database. I'm working my way through the IGLA SCY Meet right now and will complete it once I receive the meet paperwork from Alina.

There were two (2) FINA World Records set at SMOC. Steve West, from NOVA set the 50-54 Men's 50 LCM Breast Record, and Danielle Herrmann, from Clovis in PC, set the 35-39 Women's 50 LCM Breast Record.

There were seven (7) USMS Records set at CVMM. Doug Kajiwara from CVMM set the 65-69 Men's 1000 and 1650 Free records, as well as the 200 Back. Maurine Kornfeld from ROSE set the 100 Free, and 50-100-200 Back Records, all SCY.

There are incoming records from IGLA but those will be processed once the paperwork arrives.

Please everyone remember to submit split requests if there is the slightest possibility of setting a record or for Top 10. They must be done before the meet ends and cannot be submitted later.

As a reminder, all sanctioned USA Swimming meets are USMS Recognized and although FINA records cannot be set at these meets, times are good for Top 10 and USMS records. If you have a dual registered athlete setting T10 or USMS records at a USA Swimming meet, they must request me to add the meet/their times.

Final 2021 SCM T10 rankings are out and I am about halfway through the process of updating SPMS Individual/Relay records and All-Time Top 10 for SCM.

One more reminder--the 2021-2022 SCY Top Ten season started June 1, 2021 and will include swims from both the 2021 Short Course National Championship and 2022 USMS Spring National Championship. The 2021-22 LCM Top Ten season started Oct. 11, 2021 and will include the 2022 USMS Summer National Championship.

During the course of working on the March/April meets, I have been working with Alina because there are a couple issues between USMS records Hy-tek files and Hytek itself. All 2021 and 2022 records are imported into Hy-tek (MM6-7-8) as 1921 and 1922. If you are using MM8, updating records updates records incorrectly in some cases. Once I have documented examples sufficiently I will send to Hy-tek customer support. I have already notified Mary Beth Windrath.
